DETAILED ACTION

Restriction/Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to an oncology microarray, classified in class 435, subclass 287.2. If this Group is elected, then the below summarized specie election is also required.
- II. Claims 17-34, drawn to a kit, classified in class 422, subclass 61. If this Group is elected, then the below summarized specie election is also required.
- III. Claims 35-38, drawn to a method for detecting the expression of a cancer-specific marker in a test sample, classified in class 435, subclass 6. If this Group is elected, then the below summarized specie election is also required.

Specie Election Requirement for Groups I-III:

This application contains claims directed to the following patentably distinct species of the claimed invention:

For Groups I, II, and III:

Specie A: samples which are from breast cancer

Specie B: samples which are from skin cancer

Specie C: samples which are from head and neck cancer

Specie D: samples which are from colon cancer

Specie E: samples which are from cervical cancer

Specie F: samples which are from ovarian cancer

Specie G: samples which are from prostate cancer

Application/Control Number: 09/966,373

Art Unit: 1631

Specie H: samples which are from lung cancer

Specie I: samples which are from cancer not specified above

(if Specie I is elected, please select which cancer type)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. This distinctness or independence of the various types of cancers (Groups I, II, and III) is because each is directed to a different and distinct organ or structure with different cancerous effects. The completely separate entity types of the invention species are often separately characterized and published in literature, thus adding to the search burden if all species were examined together.

Applicant is advised that a reply to this requirement must include an identification of the specie that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should an applicant traverse the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Application/Control Number: 09/966,373

Art Unit: 1631

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I, II, and III are related as product and the process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the oncology microarray of Group I may be utilized in distinct usages as needed in Group II for a kit, in a method for detecting the expression of a cancer-specific marker in a test sample as in Group III, or alternatively, in detecting leads in pharmaceutical compositions. All of these usages are distinct as requiring distinct and different functions thereof without overlapping search due to different subject matter. This lack of overlapping searches documents the undue search burden if they were searched together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Art Unit: 1631

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR §1.6(d)). The CM1 Fax Center number is either (703) 308-4242 or (703) 305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn Smith, whose telephone number is (703) 308-6043. The examiner can normally be reached Monday through Friday from 8 A.M. to 4:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached on (703) 308-4028.

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instruments Examiner Tina Plunkett whose telephone number is (703) 305-3524 or to the Technical Center receptionist whose telephone number is (703) 308-0196.
